

slmage Help Guide

slmage

Help V 0.20 (2015. 6. 2)

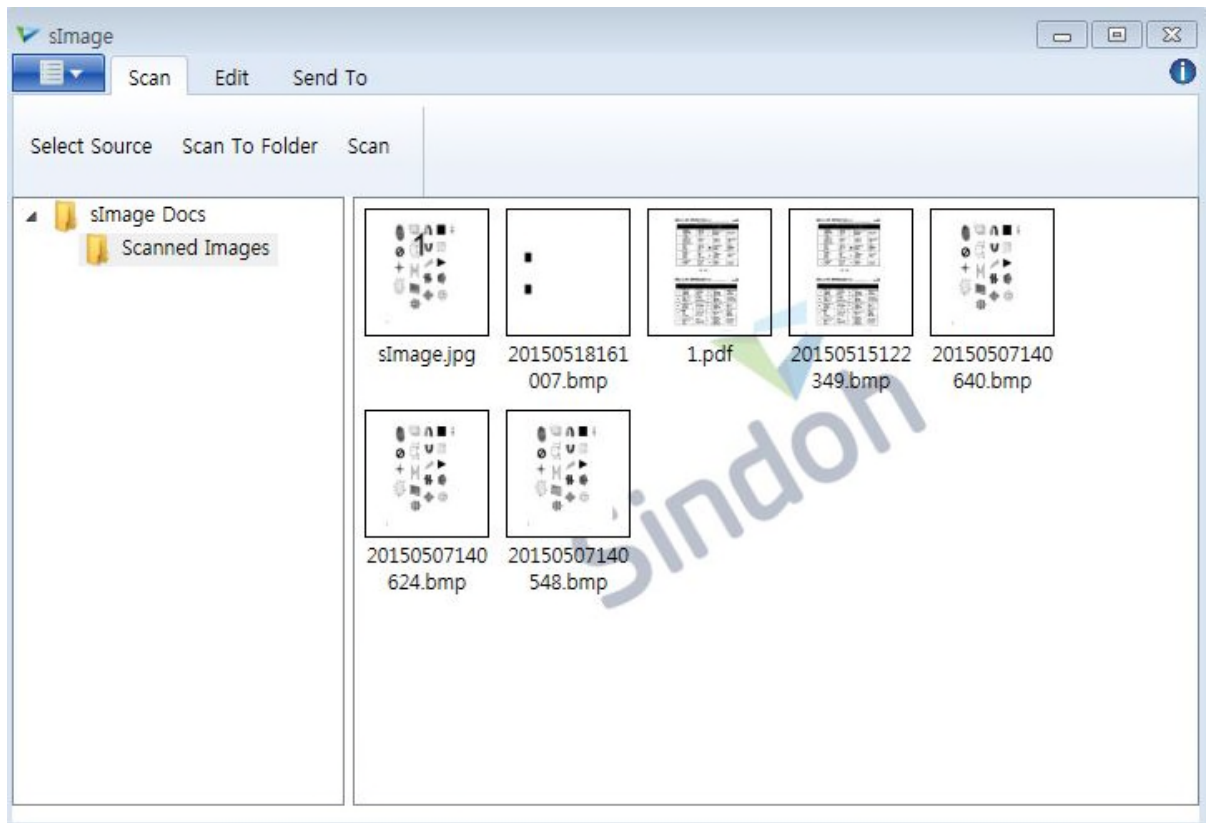

Main Screen:

Main window will appear once the program starts.

The main menu is consisted of Scan, Edit, and Send to

Select each menu on each tab to see the window on the selected menu.

- Place the mouse pointer over the menu or icon to see detailed explanation

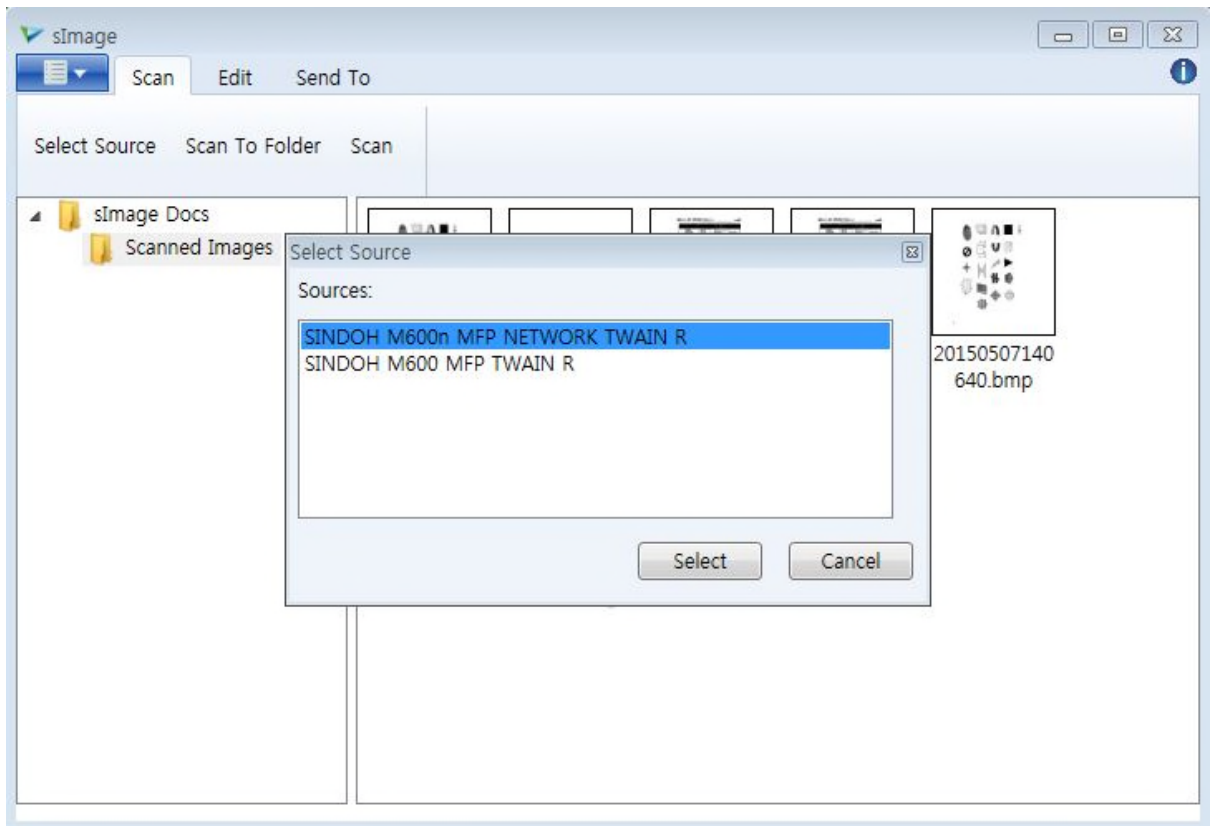

Picture 1: Scan Tab

Scan Window

Select Source:

The user can click "Select Source" and then choose an appropriate Sindoh scanner driver(Twain or WIA)..

- Only one driver can be selected before use and only Sindoh scanner drivers can be used
- Some of the several scanned images that are high quality or large images may not be saved due to limited memory.

Picture 2: Select Source Setting in Scan Tab

Scan To Folder:

“sImage Docs”(default) Folder or another folder can be selected or created to save a scanned image on the Sindoh scanner driver. New folders created under default folder will appear on the left where folders are managed.

Scan:

Documents on the scanner can be scanned. The scanned image will be saved on the selected directory on the “Scan to Folder”

- The scanned image when saving will be in BMP file format and the name as time of scanning.
- sImage Docs default folder is fixed. Placing the mouse pointer over the default folder will show the directories.
- sImage does not support drag and drop. Please use the functions on the menu
- Print function is not supported

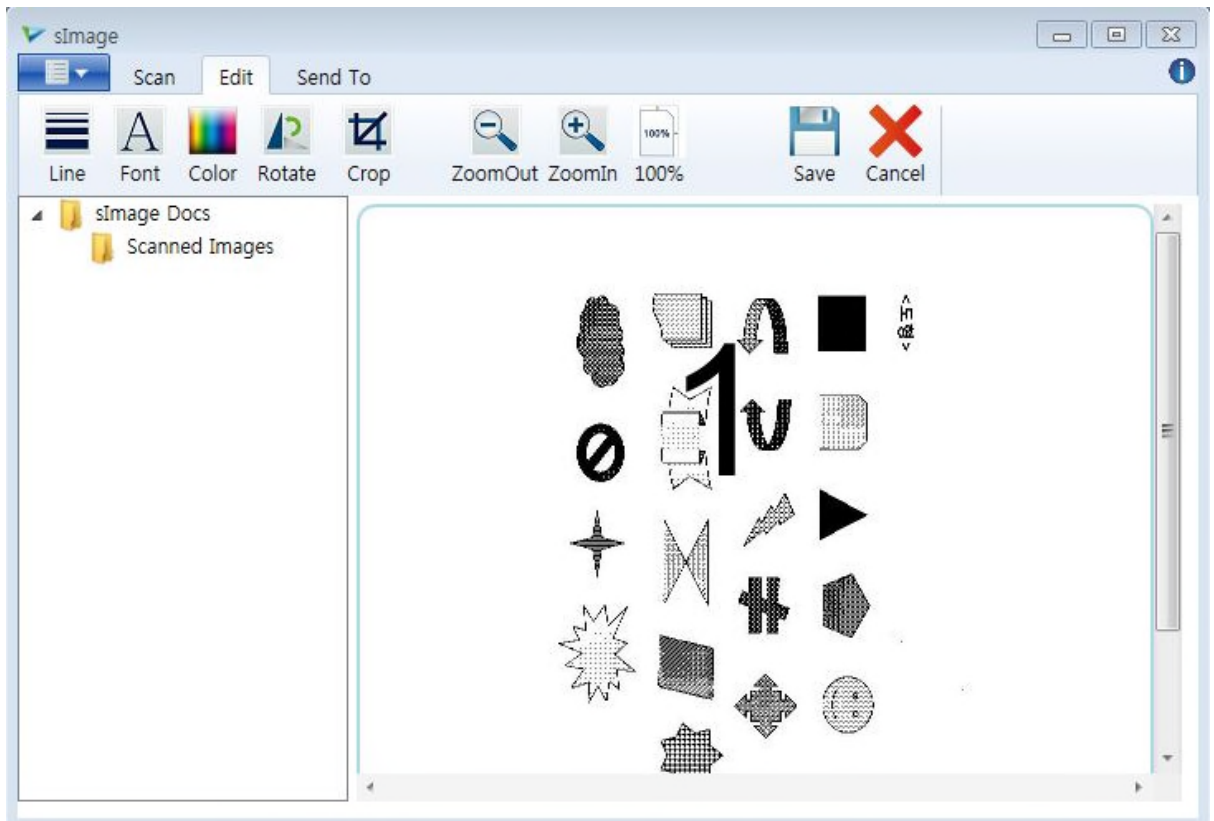

Edit Window

Images can be edited by double clicking the scanned image(thumbnail image on picture 1) or by clicking “Edit” tab after selecting the image.

“Line”, “Text”, “Color”, “Rotate”, “Crop” functions are available.

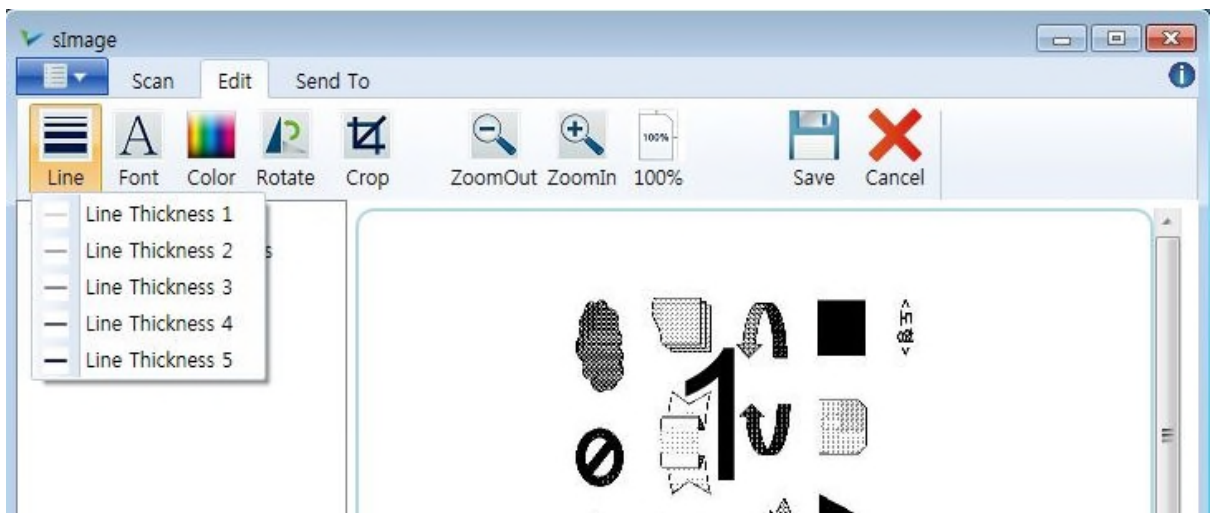

The edited image can be saved by clicking “Save”

The edited content can be canceled by clicking “Cancel”

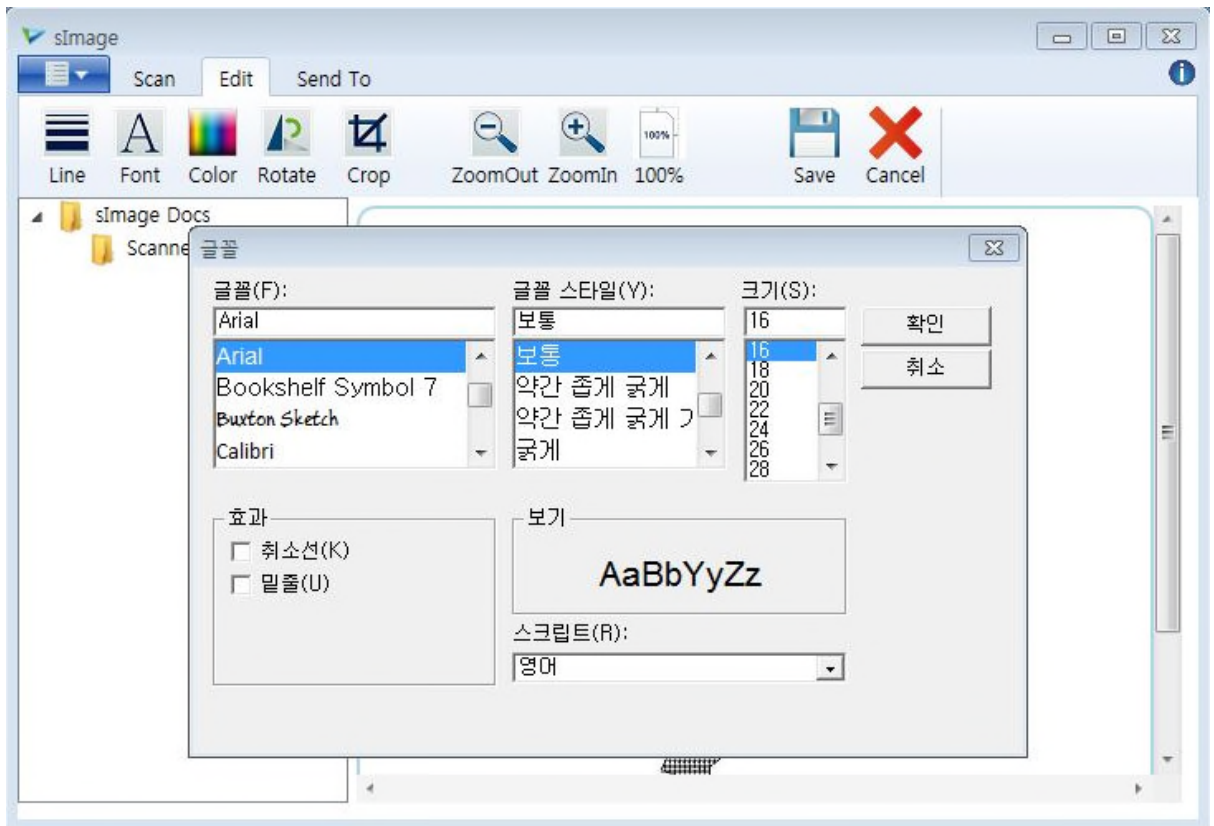

Picture 3: Editing Selected Image

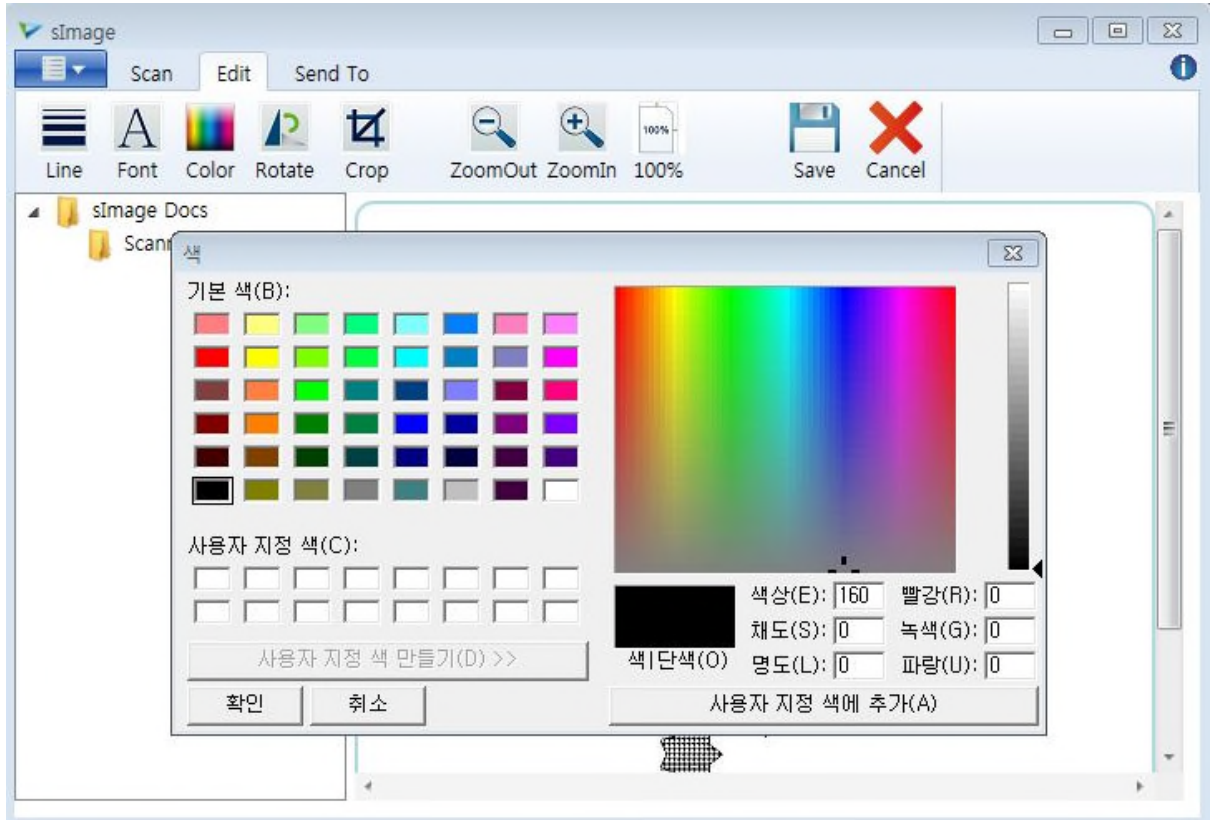

- Please use a different program for editing PDF file.
- Please save frequently during editing. It will not temporarily save during editing.
- Further editing is not allowed for fonts or lines on the "Edit" tab once the edit is completed.
- Please note that all the edits made will disappear once you click "Cancel".

Picture 5: Selecting Font

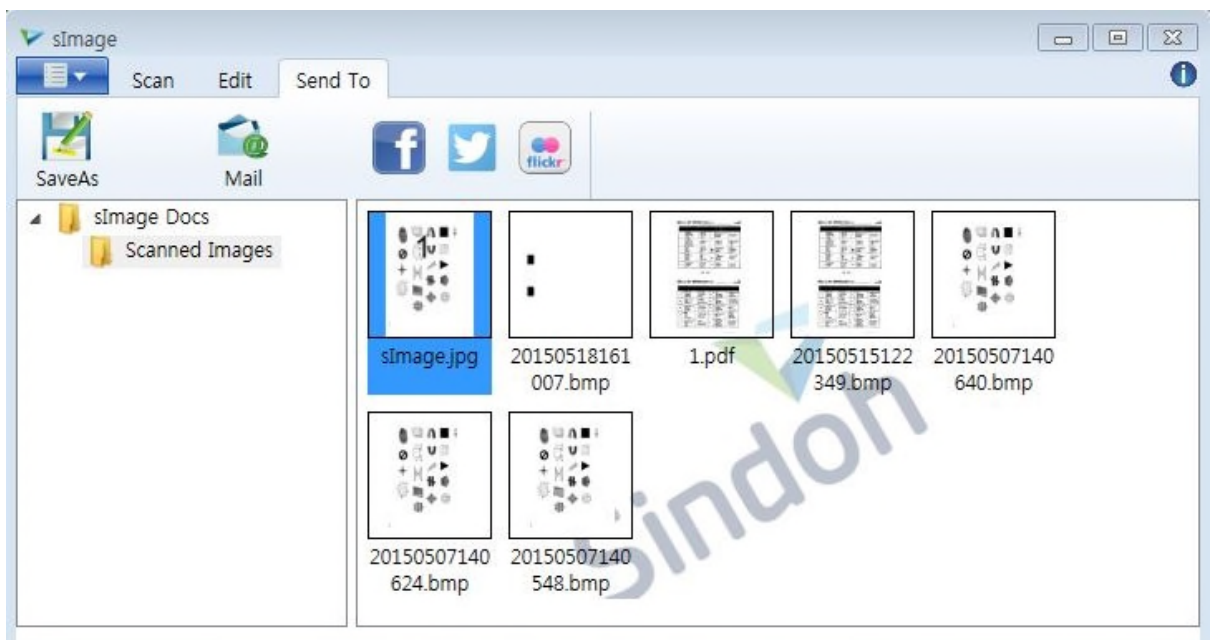

Picture 6: Selecting Color

Picture 7: Selecting Image Rotation

Send To Window

“Send To” tab can be opened after selecting an image
 The saved image can be used for “Send To” function

Picture 8: Opening “Send To” After Selecting Image

Save As:

Images can be saved in one of the following format: BMP / JPEG / PDF/ PNG / TIFF.

Picture 9: Saving in a Selected Format Under “sImage Docs” (Default) Folder

- Saving one image per file is recommended. It may not save if many images are attempted to be saved in a single TIFF or PDF due to memory shortage.
- Saving different resolution images in separate files is recommended. The size of the images may differ if images with different resolutions are saved in a single TIFF or PDF file.

Mail:

Standard email client program can be launched through the mail button or menu to send emails with images attached.

- Checking the status of emails depends on the email program it is connected to. For Outlook, please start the program and check the sent folder.
- Attached images in an email is affected by the email program it is connected to or the settings of the email size limit. Please check the information provided in the email program being used.

Facebook/Twitter/Flickr:

Images can be sent to SNS such as Facebook, Twitter or Flickr (Please refer to each of the below SNS log in screen)

Picture 10a: SNS user authentication window during Facebook log in

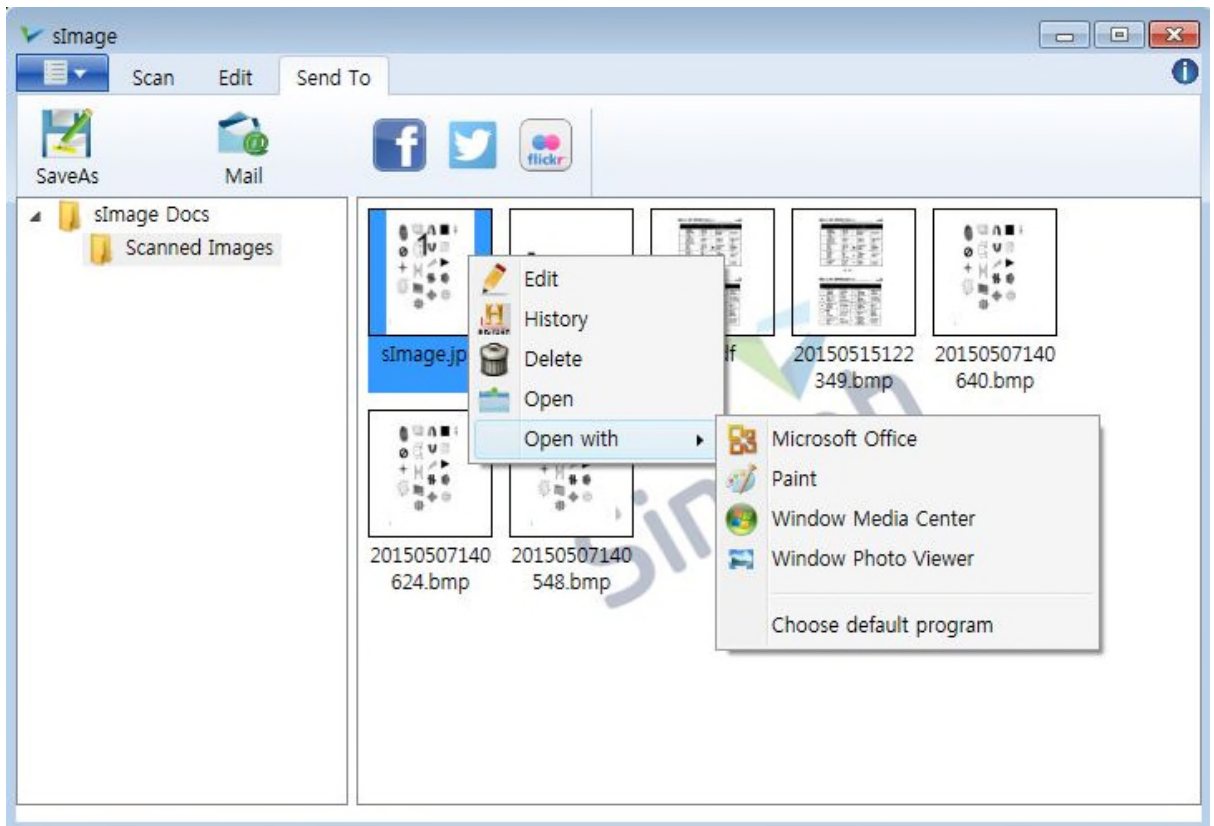

Picture 10b: User authentication during Twitter log in

- PDF file cannot be uploaded on SNS
- Only the first image will be uploaded or it will not be uploaded if the TIFF file contains many images. Please use files with one image.
- SNS will be automatically be logged out when exiting slmage. The maintain log in does not have to be checked for the protection of user information. (If it is checked, the log out function may not work properly)
- Privacy settings for SNS picture (only me, only friends, all) cannot be changed from slmage. Please log in to the SNS to change this setting.
- If the image size is over several MB, it is affected by the SNS service and data transfer. The safest way to overcome this is to convert it in to a low sized file type(ex: jpg. Png)
- Additional pop up window may appear depending on the user's SNS account access settings or the privacy policies.

Picture 10c: User authentication during Flickr log in

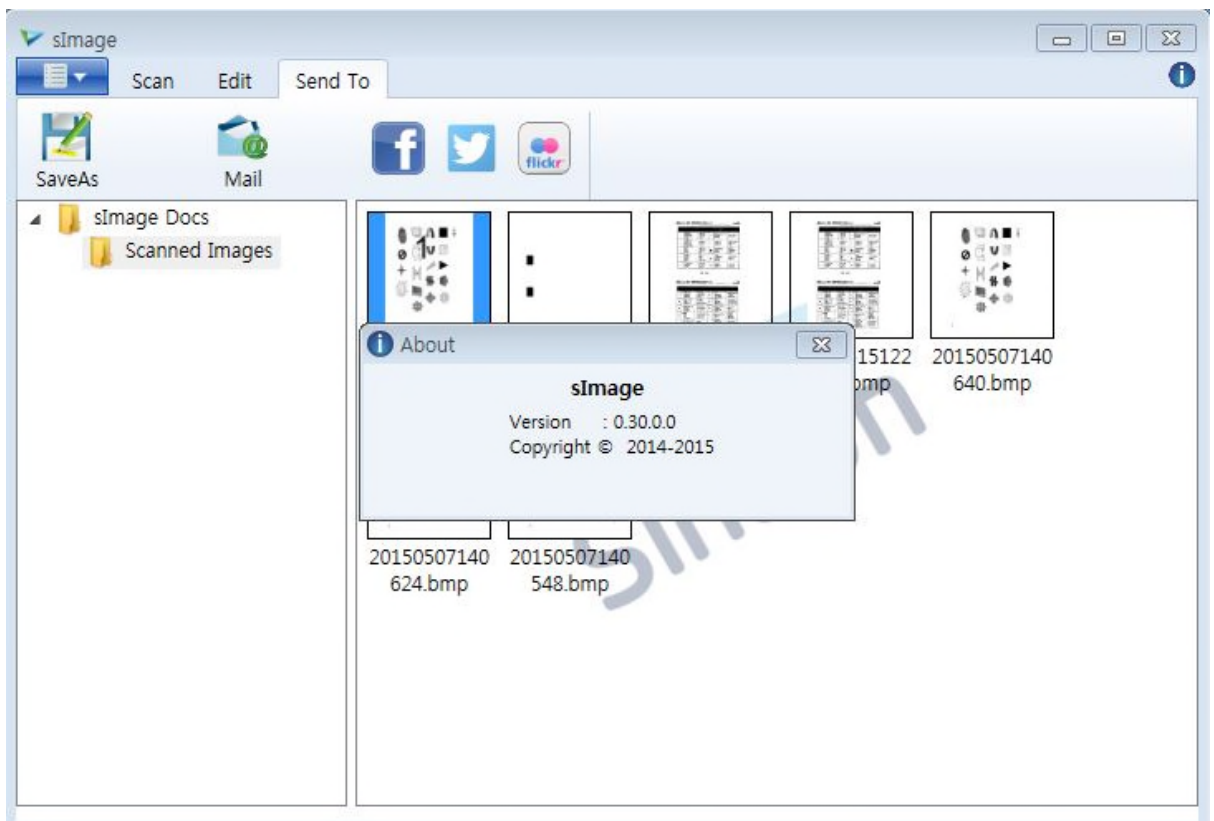

“Edit”, “History”, “Delete”, “Open”, “Open with” will appear. Use “Edit” to edit or use “Open” to open with window basic viewer or use “Open with” to open files with a different application.

Picture 11: Using thumbnail image by right clicking

Info Window:

Copyright information will appear when clicking the info icon on the top right corner of the window.

Picture 12: Info window

- The slmage can be installed on Windows XP SP3 (x32), Vista SP2 (x32), 7 (x32, x64), and 8.1 (x32, x64).
- The slmage can be installed on Windows XP SP3 (x64), Vista SP2 (x64), Server 2003 (x32, x64) and Server 2008 (x32, x64), but is officially not tested and supported.
- MS .Net Framework (above version 4.0) may have to be installed first depending on the version of the OS.
(Please use the following link to download MS .Net Framework 4.0 for U.S. English version : <https://www.microsoft.com/en-US/download/details.aspx?id=17851> Or please go to Microsoft webpage.)
